KALASHNIKOV USA – HERITAGE

Meeting the US Market's Demands

2014 has been both a very exciting and challenging year for RWC and Concern Kalashnikov. After working with Izhmash for over two years, and building relationships with our customers, RWC Group LLC was given the opportunity to become the exclusive U.S. importer and distributor of products under the Concern Kalashnikov marketing brand umbrella, including the Izhmash and Baikal product lines. By April, we were able to achieve one of our many goals of delivering 922(r) compliant rifles and shotguns based on the AK-47 design to meet the increasing US market's demands. In Russia, the factories were entering a period of modernization to meet the increased worldwide demand for their sporting and hunting rifles, shotguns, and airguns.

Clouds on the Horizon

World events overtook the center stage, overwhelming our successful cooperation with our partners. Ukraine's crisis led President Obama to impose economic sanctions against a few sectors of the Russian economy, including Concern Kalashnikov. As of July 16, 2014, no further imports of the beloved Saiga rifles, shotguns, and other fine sporting firearms from Izhmash are to be allowed into the United States.

2015 - The Future is Clear

The change in U.S. foreign policy has forced us to redefine our business model, going from one of an importer to a U.S. manufacturer of the iconic products that are rooted in world history and have earned a legendary reputation of reliability and simplicity of design.

This catalog presents both the last of Izhmash manufactured products to reach the U.S. shores and the newest U.S. production committed to preserving a Russian heritage dating back to 1807—paying full tribute to commemoration of the long and rich life of the late General Mikhail T. Kalashnikov, a world class engineer, designer, and visionary of the AK-47. Our new products will proudly bear the name Kalashnikov USA as a tribute to the man and the continuation of the heritage and traditions he inspired. We are committed to preserving the traditions of quality, reliability, simplicity of design, and ruggedness, while utilizing all of the technological advancements of the 21st century. Thank you for continuing to working with us during these changes. The U.S manufactured products will be available during the second quarter of 2015. We look forward to serving you in the future and continuing this legacy of excellence.

SAIGA® FIREARMS

SAIGA® AUTOLOADING RIFLE

LIMITED QUANTITIES OF RUSSIAN MANUFACTURED SAIGAS® REMAINING

Rugged And Reliable Rifles. The Saiga® autoloading rifle is based on the rugged Kalashnikov design. In the Saiga® line of rifles, this timeless design utilizes a proven gas piston system, rotary bolt, and very few internal parts that provide the reliability that Izhmash has delivered for over 60 years. A hammer forged, chrome lined barrel and chamber provide the ultimate in long life. The drift-able post front sight with protective ears is adjustable for windage and elevation. The notched side catch with bar rear leaf sight

is adjustable for elevation. The rear sight has presets for 109, 218, and 328 yards. The comfortable, ergonomic operating handle makes charging the firearm effortless. The spring-loaded magazine release provides for quick magazine changes. The elongated selector handle allows for a smooth transition from safe to semi-auto. Includes one detachable magazine. The .308 model will be available in two barrel lengths, 16" or 21.9".

AVAILABLE IN:
[7.62/.223/5.45/.308]

FEATURES

- × Simple, effective, and reliable firearm for hunting and self-defense
- × Gas operated rotating bolt with detachable magazine
- × Side rail for optical sight
- × Equipped with a high impact polymer hunting buttstock and forend

SAIGA® AUTOLOADING SHOTGUN

RUSSIAN HERITAGE NOW MADE IN THE USA

The Superiority Of The Autoloader. The Saiga®autoloading shotgun incorporates the Kalashnikov design, providing reliability and simplicity of operation. Outstanding accuracy is achieved by the smooth bore barrel and exterior threading to accept chokes. The chrome lined barrel, chamber and gas system resist corrosion, making cleaning easier and extending the life of the shotgun. A lightweight, impact resistant polymer sporter stock and

forend are checkered for comfortable control and include 3/4" sling mounts. An oversized trigger guard allows use with gloved hands. Models are available with side optic mounting rails, bead front sight, V notch rear sight or leaf rear sight. Included is a detachable five round magazine.

AVAILABLE IN:
[12/20/410 GA]

FEATURES

- ✗ Semi-automatic gas piston design with detachable magazine
- ✗ Smooth bore barrel
- ✗ Optional leaf sight adjustable for windage and elevation

SAIGA® RIFLE

The IZ132Z brings the Russian AK47 into the 21st century with designed functional modularity. The transformation of the reliable Izhmash Saiga into a modern firearm begins by stripping the Saiga down to the bones, moving the trigger group forward to install the pistol grip, replacing the forend and modifying the front trunion to accept the standard AK47 magazines. Utilizing 922(r) compliant parts in the rebuild; the IZ132Z is outfitted with CAA furniture to update this classic for the 21st century user. This provides the user with a six position collapsible stock and a vertically and horizontally adjustable cheek piece for comfort and

proper eye alignment with the sights. The forend includes four Picatinny rails to facilitate the mounting of lights lasers and forward grips. The comfortable ergonomic vertical forward grip with storage and a rubber backstrap provides control over muzzle rise. The pistol grip has six interchangeable rubber finger grooves and back straps to provide a sure grip for any size hand plus a capped interior storage compartment. The extended magazine release guarantees quick magazine changes from either side of the rifle.

MODERN RIFLE

SAIGA® RIFLE

MODERN AK RIFLE WITH SKELETONIZED STOCK

The Modern Rifle with Skeletonized Stock Saiga® upgrade updates the classic Kalashnikov design with the addition of the CAA skeletonized collapsible buttstock with unique extension design and a rubber recoil pad. The use of the AKTSP stock tube allows the stock to sit horizontally with the receiver providing an improved sight picture. The ergonomic pistol grip with interchangeable finger grooves and backstraps provides a strong and comfortable

grip. The skeletonized RS47SET polymer forend with 4 rails adds mounting platform for lights, lasers, forward grips and optics. The UPG47 Pistol Grip with six interchangeable finger grooves and backstraps provides a strong, comfortable grip even while wet. All required parts are 922[r] compliant.

SAIGA® RIFLE

This AK74 variant updates the traditional folding stock model preferred by paratroopers and special operations units. The addition of an ambidextrous 6 position folding stock provides for use in urban and CQB conditions. The CAA stock tube can be folded to either side of the receiver and accepts all AR15 commercial stocks. Included is CAA's new skeletonized stock with rubberized overmolded cheekpiece and unique length locking mechanism to eliminate inadvertent length adjustments. The stock tube is horizontally positioned to provide proper access to the

sights and the length can be adjusted to accommodate NATO users. The grooved rubber butt pad is removable. Modernization is completed with the addition of 4 rails on the skeletonized handguard and 6 interchangeable rubberized finger grooves and backstraps on the pistol grip. The Modern Folding Skeleton Stock Rifle allows the addition of all Picatinny rail mounted accessories so this reliable 922[r] compliant firearm can accommodate any mission.

SAIGA® RIFLE

The SU3 Saiga® upgrade updates the classic Kalashnikov design with the addition of the CAA fully adjustable stock (SRSNL) featuring a ten position adjustment for stock length, cheekpiece is adjustable for height and eye relief, and the rubber butt pad is vertically adjustable. The pistol grip with 6 interchangeable inserts for the finger grooves and backstraps (UPG47) allows the grip to be sized for

any hand. A snap cap covers storage in the pistol grip for batteries and other small items. The aluminum 5 Picatinny rail system (XRS47) is designed for the secure mounting of heavy optics. The receiver dust cover is accessible and removable without removing the rail system. All required parts are 922[r] compliant.

SAIGA® SHOTGUN

TACTICAL SHOTGUN

The popularity of the Saiga 12 ga. shotgun stems from the reliability of its gas piston system design, the economical use of parts combined with a detachable magazine for quick reloading. RWC improves on the timeless AK-47 design by adding the features you want in a tactical shotgun. In our 922(r) conversion RWC welds our proprietary muzzle brake onto a shortened barrel so the overall barrel length remains at 18.25". The muzzle brake is designed to significantly reduce recoil, felt concussion and muzzle rise. The gas port and gas block are enlarged to improve functioning with all loads, the forend is vented to increase barrel cooling. A

multi-sized pistol grip is added to increase firearm control. The inclusion of a six position collapsible skeletonized butt stock with removable butt pad with an over-molded rubber cheek weld increases user comfort while reducing the overall firearm weight.

The results speak for themselves, a comfortable, more controllable, more reliable shotgun that feels like you are shooting light 20 ga. shells instead of 12 ga. hunting loads. This combination of comfort, control and reliability make the RWC tactical shotgun perfect for tactical, three gun, and other shooting sports.

SAIGA® SHOTGUN

TACTICAL FOLDING SHOTGUN

This 922(r) compliant Saiga shotgun upgrade features a machined steel folding stock combined with pistol grip that is adjustable to fit all hand sizes. An aluminum triple Picatinny rail forend reduces weight and the extended length muzzle brake rounds out the design to optimize the meaning of a folding tactical shotgun. This combination of options allows the user to mount operational lights, lasers forward grips and accessories. The extended muzzle brake provides additional recoil reduction and further

limits concussion blast. The folding stock allows for quick maneuverability in tight quarters and when extended has the strength to be used as a battering ram. As with all of our tactical shotgun upgrades the gas port and block are enlarged for improved functionality with all shot shell loads and all bolt, carrier and receiver mating surfaces are smoothed and polished for an effortlessly smooth and flawless functionality.

SAIGA® SHOTGUN

Our new 922(r) compliant IZ1093G is designed by competitors who know what it takes to win. Originally formed in Vulcan's fires by skilled Russian craftsmen, we completely strip down the IZ109 shotgun. Using our own skilled craftsmen smooth and polish all bolt, carrier and receiver mating parts, insuring smooth, reliable and quick performance. Then the gas port and block are enlarged to improve functioning with all loads. A Molot style competition muzzle brake is installed to significantly reduce recoil and muzzle rise. The complete trigger assembly is replaced with a forward mounted JARD 3 lb adjustable trigger that is fitted and adjusted, providing a light, crisp and smooth trigger pull increasing accuracy. The trigger guard is replaced with an oversized one for ease of access,

even with gloved hands. A knurled left hand bolt lever is welded in place to assist with quick magazine changes. A ten round magazine is included. Finally, outfitted with a winning combination of furniture including a round, vented forearm manufactured from billet aluminum providing a lightweight, easy to grasp, heat reducing surface, a pistol grip with six interchangeable rubber finger grooves and back straps allowing everyone a firm and comfortable grip. A lightweight six position skeletonized stock with recoil reduction completes the competition package to increase accuracy and reduce weight, recoil and muzzle rise. The result is an affordably priced competition winning shotgun.

IZHMASH® TARGET RIFLE

Over 120 Biathlon Medals Won. The latest evolution of the Izhmash Biathlon line of rifles, these models represent a truly world class competition rifle for the Winter Olympic sport of Biathlon. Based on the proven straight toggle lever lock system developed over 30 years ago by Izhmash, these rifles allow fast cycling of the action between shots with minimum disturbance of the shooting position – a tremendous advantage in a sport where thousands of a second can separate a gold medalist from an also-ran. Trigger is adjustable for single or two-stage function,

length of first stage, creep, and release weight (50g-1500g). Improved hammer forged barrels with reliable accuracy to -20° C provide confident performance in all conditions. A completely redesigned stock provides optimum ergonomics for both shooting positions, including the maximum 120mm stock depth allowed by current IBU regulations. Other improved features include a lighter front sight assembly, compatibility with industry standard M18x0.5mm front sight accessories, an adjustable butt plate and cheekpiece, and industry standard accessory rails.

BIATHLON 7-4 (VER 8) / 7-4 (VER 10)

AVAILABLE IN:
[.22LR]

FEATURES

- ✗ Reload without changing the ready position with toggle lever barrel bore locking system with vertical rotation axis
- ✗ Chrome lined, hammer forged, air gauged barrel for improved accuracy in low temperatures
- ✗ Trigger mechanism is adjustable without removing the action from the stock
- ✗ Hammer interlocking device in trigger mechanism allows for shooting blanks
- ✗ Center of mass, cheekpiece and the match stock are all adjustable

ADDITIONAL FEATURES

The Biathlon 7-4 ver. 8 & 10 comes complete with a removable rear optical notch sight, hooded front sight tower, eight magazines, sling, a leather carrying case with handle and detachable strap, cleaning rod, oiler and tools in a carrying case. Stock is naturally finished hardwood and

metal components feature an extremely durable matte black finish. The Model 10 features a chrome plated receiver and barrel in place of the matte black finish for further improved weather resistance and durability.

IZHMASH® TARGET RIFLE

TARGET RIFLE. This collectable and practical .22 LR target rifle features the famous Biathlon toggle lever action for quick round chambering. This world famous action, found on many championship Olympic rifles, provides the quickest reloading during any match and is now available at an affordable price.

The toggle lever action is mated to a free floating, long lasting, cold hammer forged heavy barrel, factory tested

to produce 1" groups at over 50 yards. A 4" Weaver scope base is factory installed for mounting the optic of your choice. The practical birch hardwood hunting stock with pistol grip hand checkering and a polymer butt pad provides a strong and comfortable platform for all of your target and small game activities. The safety is mounted on the trigger guard for quick access and two 5 round magazines are included.

BIATHLON BI-2-7KO

IZHMASH® HUNTING RIFLE

SOBOL & KORSHUN

HUNTING RIFLE. Birds And Small Game. The accuracy, comfort, and ease of operation in a .22LR hunting rifle for birds and small game.

Both the Sobol and Korshun feature a monte carlo stock with checkered pistol grip providing comfort, control and accurate shooting. The stock features magazine storage and is available in birch hardwood or walnut. Just as in Izhmash's world famous biathlon rifles, the Sobol's action

is operated with a toggle lever allowing for quick and easy reloading. The receiver's dovetail base accommodates an optical-sight mount. The design allows for shooting over the iron sights without removing the optical one. The hooded front sight reduces glare & prevents damage. The Korshun's semi auto free blow back action is operated using a finger lever. The safety for both models is mounted on the trigger guard.

BAIKAL® RIFLES & SHOTGUNS

BAIKAL® SIDE-BY-SIDE SHOTGUN

Side By Side Shotgun. The MP-43's classic, timeless and well-balanced design packs world class quality and shooting excellence in both barrels. Born of our rich history in craftsmanship, the MP-43 has been a staple of production for more than 55 years. While we live in a constantly changing and evolving world, the MP-43

continues its legacy as one of the world's most reliable and value-driven side-by-side shotguns. Wherever you go, whatever elements you encounter, the MP-43's rugged durability means it will be there when you need it most for years to come.

MP-43

**AVAILABLE IN:
[12/20 GA]**

FEATURES

- ✗ Automatic, double-locking tang safety locks, sears and triggers for safety while walking
- ✗ Chrome-Lined hammer-forged barrels with screw-in chokes
- ✗ Chrome-Lined chamber prevents corrosion
- ✗ Mono-Block machined steel receiver with deep blued finish
- ✗ Single selective trigger
- ✗ High quality hand-checked walnut or birch stock and forend with rubber butt pad
- ✗ Box-Lock action
- ✗ Auto-Selector and ejector

BAIKAL® SIDE-BY-SIDE SHOTGUN

Side-By-Side Shot gun With Double Trigger And External Hammers. The MP-43KH's design includes all the quality, precision and safety elements of the MP-43E-1C but is designed for those hunters and shooters who also are cowboys at heart. Few things stir our American spirit and passion for the Old West like Cowboy Action Shooting. Nearly all of us, at one time or another, have wished we could experience the grit and glory of our 19th century western culture – six- gun on your hip and shotgun at the

ready. Maybe you'd rush headlong into a cattle drive or simply roam the open range. Either way, the MP-43KH complete with safe external hammers and side-plates, stirs that timeless spirit with the look of a genuine antique Cowboy Action firearm. The MP-43KH offers the same quality, reliability and service life that made our break-barrel action famous. Whether shooting or hunting, the MP-43KH offers the same high quality, reliability and long service life consistent with our Baikal break barrel design.

MP-43KH

**AVAILABLE IN:
[12 GA]**

FEATURES

- ✗ An automatic safety that locks the sears and triggers
- ✗ Hammer comes rearward for safety while opening the breech
- ✗ Unique (patented) trigger action is secured against accidental discharge until the triggers are pulled
- ✗ Internal hammer block design prevents accidental firing if the hammers are inadvertently hit

BAIKAL® OVER-UNDER SHOTGUN

Over-Under Shotgun. Considered the most famous Baikal shotgun ever produced, the MP-27EM-1C's legacy remains beyond reproach. After 40 years and over two million shotguns, the MP-27EM-1C is still enjoyed by discerning professional and amateur hunters and shooters in every climb and place. With quality-driven dependability

perfected to provide the highest level of reliability and balance, the MP-27EM-1C's shooting performance also stands up against other over-and-under shotguns costing many times more. A wide variety of models provide even the most discriminating shooting enthusiast the perfect choice.

MP-27EM-1C

AVAILABLE IN:
[12/20/410 GA]

FEATURES

- × Chrome lined hammer forged barrels with screw in chokes (.410 chokes are fixed), vent rib with bead sight
- × Chrome lined chamber prevents corrosion
- × Simple and dependable locking mechanism design
- × Mono-Block machined steel receiver with deep blued or nickel finish
- × Hand checkered walnut stock and forend with rubber buttpad

BAIKAL® BREAK ACTION OVER-UNDER COMBINATION RIFLE SHOTGUN

Break Action Over-Under Rifle Shotgun Combination. Combining all the advantages of both a rifle and a shotgun resulted in our MP94. Leave that backup firearm in the safe. The MP94 covers it all with both rifle and shotgun functionality at a value-focused price point. True to Baikal's name, you can expect the same premium quality and reliability standard in all of our firearms. The MP94 is now

offered in .410 with .22-LR or .22 WMR combinations. The new .410 shotgun/rifle combination lives up to the same demanding criteria as our 12-gauge and .223 Remington, .308 Winchester and .30-06 Springfield combinations. The MP94 is modeled after the precision quality and reliability of our MP-27EM-1C while also incorporating other unbeatable performance focused features.

MP-94

AVAILABLE IN:
[12 GA/.223]
[410 GA/.22 WMR]
[410 GA/.22LR]

FEATURES

- × Bottom-Placed barrel reduces recoil

BAIKAL® SIDE-BY-SIDE BREAK ACTION RIFLE

Side-By-Side Break Action Rifle. The MP221 reinvented the classic side-by-side rifle while maintaining accuracy in both barrels at an affordable price. The MP221's elegant appearance and light weight underscore the reliability derived from the MP220 design. Accuracy in both barrels

is achieved by use of a rib-less joint between the barrels, the loose fit of the RH barrel into the front sight sleeve and the use of a jackscrew between the barrels to set zero. Available in .30-06 Spr. or .45-70 Govt calibers.

MP221

**AVAILABLE IN:
[.30-06/.45-70]**

FEATURES

- ✗ Hammer-Forged chrome-lined barrels with screw-in chokes
- ✗ Checkered walnut stock and forend with rubber recoil pad
- ✗ Mono-Block machined steel receiver with deep blued finish
- ✗ Auto-Tang safety – Locks sears and triggers
- ✗ Double triggers
- ✗ Adjustable rifle sights with 4.3" inch dovetail rail for mounting optics

BAIKAL® SEMI-AUTO SHOTGUN

Semi-Auto Shotgun. The new MP155 has a lighter weight and improved balance than it's predecessor. Now with an adjustable comb drop, facilitated by spacers between the stock and receiver. The trigger group has been redesigned to provide a shorter trigger travel and a larger safety button. The MP155 is the workhorse of semi-auto shotguns, easily digesting any combination of 3 ½", 3' and 2 ¾" 12-gauge

loads through an under-barrel tube magazine, without adjustments. The MP155 offers flawless performance at high-firing rates with the rugged reliability you demand from premium quality firearms. The MP155 is the perfect solution for law enforcement, hunting, target shooting and home protection applications.

MP155

**AVAILABLE IN:
[12 GA]**

FEATURES

- ✗ Self-Regulating gas-operated system with manual over ride
- ✗ Breech-Block attached directly to the barrel – Provides solid lockup – Allows the use of a lightweight aluminum alloy receiver
- ✗ All parts exposed to gas (barrel bore, chamber, piston, gas chamber, and the magazine tube) are chrome-lined
- ✗ Stainless steel valve and piston rings
- ✗ Vent-Rib with bead sight and screw-in chokes
- ✗ Hammer-Forged chrome-lined barrel
- ✗ Removable hammer type trigger group – Prevents discharge when the bolt is not fully locked - Blocks the trigger with a manual safety

BAIKAL® AIR RIFLE

MP61

Air Rifle - Single Shot & Repeater. Our MP61 Spring-Piston Five-Shot Repeater Air Rifle is the perfect match whether you're a new shooter, introducing someone new to our shooting heritage, teaching marksmanship or just getting in some plinking time. The MP61 combines rugged reliability and proven accuracy to ensure confidence building shooting and training. Along with tighter shot patterns, the MP61 includes a fixed barrel with side-cocking lever, slide pellet feeder and removable magazine. The polymer

forend and stock with cheekpiece is adjustable for length and allows for mounting of red dot and magnified optics. The MP61's greatest attribute is value. With premium quality, spot-on accuracy, proven durability, and the type of price point Baikal is famous for, the MP61 may well be the perfect shooting storm! The MP61 Spring-Piston Air Rifle is easy to cock, fun to shoot and fairly quiet with a noise level ranging from low to medium.
